Current
AFFAIRS

Artificial Reef

The Department of Fisheries is promoting artificial reefs under the Pradhan Mantri Matsya Sampada Yojana to revive coastal fisheries.

Artificial reefs are technological interventions.

They are used to manage aquatic resources, including improving natural habitats, increasing productivity, and habitat enhancement.

This will reduce the damage caused by waves on the beaches and help in the regeneration of the marine ecosystem. It will also act as a carbon sink.

Recreational fisheries and ecotourism will be promoted, creating suitable areas for diving and helping to reduce conflicts.

Bottom trawling may be banned in adjacent coastal areas.

Scientists of the Zoological Survey of India have discovered a new marine fish species in West Bengal.

This new species of fish is commonly called gurnard or sea-robins.

It belongs to the Triglidæ family. About 178 species of this family are found throughout the world.

These have long and thin opercular spines and short cleithral spine.

There are pectoral fins on the thorax, which have black membranes on their inner surface.

A white back part.

Three small white spots on the wing.

The Union Ministry of Housing and Urban Affairs is organizing the two-day India Smart Cities Conclave 2023 in Indore, Madhya Pradesh from today.

Under this, tomorrow President Draupadi Murmu will honor the winners of the Fourth India Smart City Awards Competition 2022.

This program will provide a platform for various cities to showcase their notable work under this Mission so that they can help shape the future of urban transformation in the country.
