PROFILE

I started my career as an educator and over time I became known as a Speed Maths author and a Motivational Speaker. My first book on speed maths was published in 2004. In 2012, I decided to make speed maths my profession and got the opportunity to work with TIME and other prestigious institutions. I visited many colleges in India and found students in a state of conflict regarding personality, education and career. I guided them through this conflict and thus became recognized as a motivational speaker. In 2018, I chose to turn that into a profession and started developing courses on personal development and career planning and since then I have been offering these courses as soft skills training in colleges.
