SUMMARY

I am continuously doing the work of teaching IAS students for the last 4 years, in which direction we have worked in important institutes of India and have played an important role in bringing them to a certain point. I am working, in whose first faculty I am, and since then in the last 18 months, we have got 4 lakh subscribers on YouTube and around 9000 admission in one and a half years to this channel and have worked tirelessly to grow this channel. .

The quality of the content taught by me to the Aspirant is according to the examination and with simple and simple language, an attempt has been made to make the lectures accessible to the Aspirant in a practical manner. I am committed to reach new heights towards the organization and the Aspirant, working even harder, using all the experiences I have gained.

Thanks Regarding uzair khan
