- Languages : C, C++, Java .
- Database : MySQL, MS Access.

Academic Projects

E-Cops (Minor Project) : E-Computerized Operations for Police Services.

This feature is made available to public for interaction with police indirectly.

This system registers the complaints from people through online and is helpful to the police department in catching criminals.

In this system any person can give any complaint anytime. The aim of this project is to develop an E-cops reporting and management system which is easily accessible to the public, police department and the administrative department.

Technology : Java , MS-Access.

Online Shopping (Major Project) : Online Marketing is available 24 hours a day and many customers have Internet access both at home and at work office. Customers in Online

Marketing, can buy products with the products showing its complete detail. All products with variable price, size or brand can be viewed at this one place. Online Marketing provides 24/7 services and all types of requests to its customers. Products are available with all basic information including its price, brand and one color picture. Any item can be searched here in the search box.
