C

Women comprises a half of the world demography. They are a major partner of development. As Virekhandra said -

"Educating a woman is to educate the entire family".

It is true to its word. Education not only empowers women but it also opens new avenues for them.

Political participation is increased

Evels against them are reduced

Empowerment & strength to women

children of such women are educated well

Improve family position of woman, increase their respect

Strengthens GDP, hence economy

Reduces MMR, IMR, malnutrition among children, anaemia among girls

Educated women are less likely to die early or during giving birth to child

women education is must for overall development
