- Lack of spirit of 'public service' among the government officials at present.
- Loopholes in the Right to Information Act 2005 and the weakening of the Information Commissions at central as well as state level, after the recent amendments of the act in year ~~2019~~ 2019.
- Inadequate salaries of the top government officials in comparison to their private

Counterparts also increase the tendency of taking bribe among them.

→ The ineffectiveness of the state governments as well as the Central governments to deal effectively with the cases of corruption.

→ Corrupt members of legislature, who become ministers also encourage the practise of corruption in the government machinery.

2.

Measures to prevent corruption

Corruption has now been deep-seated in the Indian society. It is not possible to eradicate it in one go. However, certain measures may help in reducing it to a large extent, which are as follows:-

a) Agencies like Central Vigilance Commission and Central Bureau of Investigation must be allowed to function independently, without any pressure from ~~the~~ the ruling party.

b) Digital-economy and cashless-economy must be promoted in order to

encourage the cashless transactions :-

c) All the government tenders must be done through 'e-tender' process only and their database must be maintained by the respective departments.

d) All the ministers at the central as well as the state level must ~~be~~ come from non-criminal background.

money :-

3. (B) 1. The situation here is really serious as one of the family members has already been killed by the terrorists. In such a condition, taking stern action against the terrorists might worsen the situation.

So, I would like to talk to ^{the} a terrorist at any suitable and secured place to fully understand the whole matter.

If they are not ready to meet me physically, then, I am also ready to ~~talk~~ talk ~~to~~ to them via phone.

It is necessary as may result in the early release of the hostages and easy negotiations.

2. Taking military action will definitely worsen the situation because it will result in the killing of all hostages by the terrorists, as their demands remain unfulfilled.

Also, there may be a public outrage, if such a strict course of action is followed in this situation.

3. In this situation, media can play an important role. The role of media might be that of the 'mediator'. It might act as a channel of communication between the terrorists and the government.

4. If at all, the situation goes out of control and all the hostages are killed by the terrorists, then, I would definitely order the special forces to kill all the terrorists as they may endanger the life of other people in that region.

5. There can be many ways of solving a problem. Another course of action could be as follows:-

- a) Firstly, I would like to talk to the terrorists in order to know their demands clearly.
- b) Then, I will communicate the same to my political heads.
- c) Then, ~~It~~ after their approval, I would ask the terrorist that their demand of releasing their comrades will be fulfilled only when they will guarantee the safe release of all hostages and surrender of all arms and ammunition.
- d) I will further give them the assurance that they will be allowed to go safely ~~to~~ out of the territory.
- e) Also, I will ask them to join the mainstream society, if they wish to.

If the ~~the~~ principle of Ahimsa is taught to every child of the world, right from his school days, then, there is every possibility that he may not indulge himself in illicit activities like terrorism, communal riots etc.
